3rd Questionnaire 3D-Cadastres: status December 2018

Poland

This questionnaire is an activity of the FIG working group 3D-Cadastres 2018-2022. The purpose of the survey is to make a world-wide inventory of the status of 3D-Cadastres at this moment and the plans/expectations for the near future (2022). By sharing this information, it should be possible to improve cooperation, learn from each other and support future developments. This is the third time that the questionnaire on 3D-Cadastres is conducted by the FIG working group on 3D-Cadastres. The first time was in 2010 in order to document the status in 2010 and expectations back then for 2014. This was followed by second questionnaire in 2014 (with status 2014 and expectations 2018). The earlier responses have been analysed and reported on (van Oosterom et al. 2011, Karki 2013, van Oosterom et al. 2014). For more information on the FIG working group on 3D-Cadastres see the website www.gdmc.nl/3DCadastres. Now a few notes and suggestions, which should be helpful when completing the questionnaire:

- The conceptual model used as background for the 3D Cadastres questionnaire is the ISO 19152 standard (ISO, 2012): the Land Administration Domain Model (LADM).
- In this questionnaire the concept of 3D-Cadastres with 3D parcels (or 3D spatial units in LADM terminology) is intended in the broadest possible sense. However, what exactly is (or could be) a 3D parcel is dependent on the legal and organizational context in the specific country (state, province). 3D parcels include land and water spaces, both above and below surface.
- A more formal definition: A 3D parcel is defined as the spatial unit against which (one or more) unique and homogeneous¹ rights (e.g. ownership right, lease or other land use right), responsibilities or restrictions are associated to the whole entity, as included in a Land Administration system.
- As the definition above is quite abstract, it is tried in the questions to be more specific and real
 world situations are used. Many examples with partial/preliminary answers from 2010 and 2014
 are available on-line at http://www.gdmc.nl/3DCadastres/participants/. Inspecting some of the
 completed 2010 and 2014 questionnaires from different other countries might help when
 formulation the answers for your jurisdiction.
- A 3D parcel is a 'legal object' describing a part of the space. Often there is a relationship with a real world/physical object, which can also be described in 3D. Please be aware of the difference between these two types of objects and that the focus in the context of 3D-Cadastres is on spaces of the legal objects and not the registration of the physical objects as such.
- If a certain question is not relevant or if you have no clue what to respond, do not spend any time on this (and leave the field blank).
- The questionnaire has been prepared by Rod Thompson, Sudarshan Karki, Alias Abdul Rahman, Hendrik Ploeger, Christiaan Lemmen, Anna Shnaidman, Peter van Oosterom. The questionnaire is grouped in the number of blocks. This has no meaning in the sense of priority and it is often the case that a question could belong to multiple blocks. Please do not feel disturbed by this.
- Similar to the earlier Questionnaires on 3D-Cadastres, the completed forms will be made available on website of FIG working group on 3D Cadastres.
- Please complete this questionnaire before 15 December 2018 and send it to
 <u>A.Shnaidman@tudelft.nl</u> (or Anna Shnaidman, TU Delft, OTB, P.O. Box 5043, 2600 GA Delft, The Netherlands).

¹ Homogenous means that the same combination of rights equally apply within the whole 3D spatial unit. Unique means that this is the largest spatial unit for which this is true. Making the unit any larger would result in the combination of rights not being homogenous. Making the unit smaller would result in at least 2 neighbour 3D parcels with the same combinations of rights.

1. General/applicable 3D real-world situations

This part of the questionnaire refers to the applicable 3D real-world situations to be registered by 3D parcels. It also addressed the types of 3D geometries, which are considered to be valid 3D representations for these parcels.

	Status 2018	Expectations 2022
1.1. Are all 3D parcels (3D spatial units	3D parcels are nor defined	
in LADM terminology) constrained to	within the Polish law	
be within one surface 2D parcel?		
1.2. Are 2D and/or 3D ambulatory ²	No	No
boundaries permitted?		
1.3.a. Is it allowed to have 3D parcels	No	No
(spatial units) not related to physical		
constructs or objects? (e.g. airspace,		
subsurface volumes)		
1.3.b. If 1.3.a positive: approximately		
what proportion of new 3D parcels		
(spatial units) would involve such cases		
(not related to physical object)?		
1.4. Are disconnected parts of a single	No	No
3D parcel allowed?		
1.5. Spatial limitation – e.g. must the		Related to closed volume
3D parcel be related to a closed volume		
or is it allowed to have 'open' or		
unbounded 3D parcels (e.g. towards the		
sky).?		
1.6. Are curved surfaces to bound the	No	No
3D parcels allowed?		
1.7. Must the curved surfaces (if		
allowed) be cylindrical sections, or any		
other constraint?		
1.8. Any other constraints – e.g. all	The limitations for	The limitations for
surfaces must be horizontal or vertical?	potential 3D parcels are	potential 3D parcels are
	defined within the Aviation	defined within the Aviation
	Law and the Geological	Law and the Geological
	and Mining Law	and Mining Law
1.9. Is there legislation (law and/or	No	
regulations) for 3D descriptions of		
parcels? If so please, mention law and		
article(s).	27	
1.10. Is the legal text available in	No	
original language?	27	
1.11. Is the legal text (relevant part)	No	
available in English translation?		
1.12. Do you have example	No	
descriptions of typical 3D parcels;		

² An ambulatory boundary is a boundary of a land parcel which follows the movements of a natural feature such as a river. Its position determined at points of time (when a survey is carried out), but between such "fixes", the definition of the property is the position of the real world natural feature.

either 'prototype' or 'operational'?		
1.13. Is there a formal model for the 3D	No	
parcels (UML style); e.g. based on ISO		
TC211 series (especially LADM, ISO		
19152)?		
1.14. Are natural resources	No	
(groundwater, mining rights, geo-		
thermal extraction and storage) shown		
in your land administration? If yes, are		
they considered as 3D parcels (spatial		
units) with RRRs attached? What about		
mining concessions (could be limited in		
time)?		
1.15. Are legally restricted spaces,	No	
above or below, such as polluted areas		
considered as 3D parcels?		
1.16. Are spatial plans considered as	No	
3D parcels (as rights or restrictions are		
related to them)? Sometimes also called		
spatial development plans, zoning plans		
or physical plans (land use, urban,		
regional, environmental,)		
1.17. Is there a Marine Cadastre? And	No	
if so, are 3D parcels included in this		
registration. Is the IHO Maritime		
Limits and Boundaries standard (S121)		
in use or under implementation?		
1.18. Is there any organised legal	Yes. The rules are given in	
instrument for the management of	the Civil Code, art. 195-221	
common property?		
1.19. Which agency is responsible for	District courts	District courts
the recording of titles information?		
1.20. Which agency is responsible for	Cadastral departments within	Cadastral departments
recording cadastral transactions?	county (powiat) authorities	within county (powiat)
		authorities
1.21. Are transactions for standard 2D		
lots and 3D lots done by the same		
agency or titles office?		
1.22. Are there any 3D storage	No	
permissions recorded (e.g. underground		
storage of CO2)?		
1.23. Any other geometric issues		
related to 3D parcels?		

2. Infrastructure/utility networks

This refers to the situation where an infrastructure network is considered to be defined within the land administration. For example in some jurisdictions, an underground network might be privately constructed for the purpose of leasing space in it for other organisations to run cabling. In this case, a network, or part of that network may be considered to be a real estate object.

	Status 2018	Expectations 2022
2.1. Do you register networks as an	Yes	Yes
entity in the land administration? (e.g.		
subterranean conduit networks)		
2.2. If so, then	a)Yes	a) Yes
(a) can the network structure be viewed	b)Yes	b)Yes
graphically in the land administration?	c)No	c)No
(b) can the network structure be traced	d)Yes (Easement of transfer)	d)Yes (Easement of
in the database(s)?		transfer)
(c) are networks registered by means of		
a cadastral identifier (such as a 'parcel		
number')?		
(d) are RRRs and parties attached to		
these network objects?		
2.3. Does the jurisdiction have private	Yes. The Civil Code, Art. 49	Yes
networks? If so please, mention law		
and article(s).		
2.4. If so, are they registered as 3D	No	No
property parcels (spatial units)?		
2.5. Is the text of relevant laws or	Yes. Regulation of the	Yes
regulations (question 2.3) available in	Minister of Administration	
original language? If so, give references	and Digitization of	
to relevant document(s).	2 November 2015	
	concerning the database of	
	topographical features and	
	the base map.	
2.6. Is the text of laws and regulations	No	No
(relevant part) available in English		
translation?		
2.7. Do you have example descriptions	No	No
of typical 3D parcels (spatial units) for		
networks; either 'prototype' or		
'operational'?		
2.8. If the network (legal) objects break	Utilities networks	Utilities networks

parallel networks?	Groups for Design	Groups for Design
	Documentation Coordination	Documentation
	on the county (powiat) level.	Coordination
		on the county (powiat)
		level.
2.9. Any other geometric issues related		
to the registration of networks?		

3. Construction/building units

This refers to 3D properties that are related to constructions and apartment (condominium) buildings. The individual units are often defined by the actual walls and structure of a building, rather than by metes and bounds. E.g. "unit 5 on level 6 of ... building".

	Status 2018	Expectations 2022
3.1. Do you register legal spaces for 3D	No	•
construction/building units (separate		
from the land)?		
3.2. If so, what are the conditions for		
doing so, and what are the most		
important types? E.g. apartment units		
(at least 2 or more in building), or also		
other buildings or even more general		
constructions (infra related; such as		
bridge, tunnel or even other, such as		
windmills,)		
3.3. Does the jurisdiction have	Regulation of the Minister of	Yes
construction/building units? If so	Regional Development and	
please, mention law and article(s).	Construction of 29 March	
	2001 on the cadastre for land	
	and buildings, Art. 14	
3.4. Is the legal text available in	Yes	Yes
original language?		
3.5. Is the legal text (relevant part)	No	No
available in English translation?		
3.6. Do you have example descriptions	No	
of typical 3D parcels; either 'prototype'		
or 'operational'?		
3.7. What would be typical 3D	No rules defined	
boundaries in an apartment complex:

mistorical point of view:	nearly finished.	
4.8. Any other X/Y coordinate issues?	nearly implied.	
Imj said II I coolamate issues.	<u> </u>	

5. Representation of 3rd dimension: height (or depth)

	Status 2018	Expectations 2022
5.1. Are the height values of 3D parcels relative to local ground?		_
5.2. Are height values reduced to a standard datum (absolute)? If so, what is the spatial reference system for this 3 rd ordinate?	Yes. PL-KRON86-NH PL-EVRF2007-NH – as a physical and mathematical realisation of European height system EVRS	
5.3. In principle possible to store both relative and absolute height values?	No	No
5.4. Is the earth surface (elevation) explicitly stored (in the DCDB or other accessible register)?	Yes. The database of aerial and satellite imaging, orthophotomap and Digital Terrain Model.	Yes. The database of aerial and satellite imaging, orthophotomap and Digital Terrain Model.
5.5. What is the source of height values for the 2D surface parcel?	Usually, there is no Z coordinate available for boundary points	Usually, there is no Z coordinate available for boundary points
5.6. How is elevation information recorded in the cadastral plan or database?		
5.7. Do you expect the elevation recorded in cadastral plans to be used for any other purpose (e.g. city models or civil constructions etc.)?		
5.8. Any other 3rd dimension ordinate value issues?		

6. Temporal Issues

	Status 2018	Expectations 2022
6.1. Are temporal limits part of the	No	No
definition of a parcel (2D or 3D)?		
6.2. Are moving parcels allowed?	No	No
6.3. Are there any limitations on the		
range of temporal limits?		
(e.g. only on 3D apartments).		
6.4. Are there any attempt to integrate	No	No
3D space and temporal representations,		
into a single 4D space/time		
representation?		
6.5. In the case of tidal boundaries,		
what happens to the 3D ambulatory		
parcel if the 2D land parcel changes		
extent due to the movement of High		
Water Mark?		
6.6. In case 3D Marine Cadastre is		
present and moving boundaries are		
allowed, how is this represented?		
E.g. using 4D geometry and topology.		
6.7. Can time bound rights be created	The right of perpetual	The right of perpetual
and extinguished in the title? (e.g.	usufruct may be granted for	usufruct may be granted
temporary titles created for a period and	40-99 years	for 40-99 years
when the time is up it can be		
extinguished)?		
6.8. Is it possible to identify all the	Yes	Yes
changes made by any operator to the		
cadastral plans or database and to		
rollback if there is an error made?		
6.9. For Cadastral transactions, how far	Only data recorded in land	
in time do buyers need to make a search	registry oblige in ownership	
to ensure the title or deed is legal?	issues.	
6.10. Any other temporal issues?		

7. Rights, Restrictions and Responsibilities

	Status 2018	Expectations 2022
7.1. Range of RRR on 3D parcels.		•
7.2. Are there any limitations on the	The limitations for potential	The limitations for
range of rights related to 3D spatial	3D parcels are defined within	potential 3D parcels are
units? (e.g. subterranean parcels must	the Aviation Law and the	defined within the Aviation
be owned by Govt).	Geological and Mining Law	Law and the Geological
7.2 And there any limitations on the		and Mining Law
7.3. Are there any limitations on the range of restrictions or responsibilities		
related to 3D spatial units? (i.e.		
currently in use and related to 2D		
spatial units, but that would not be		
applicable to 3D).		
7.4. Are there RRRs that are only		
allowed in 3D (and not valid for 2D)		
7.5. Is there specific legislation (laws,	No	No
regulations) defining 3D RRR types? If		
so, provide details, e.g. references to		
documents/ articles.		
7.6. Can 3D sub-surface/above-surface		
parcel be owned by someone other that		
the person owning the land parcel?		
7.7. What applications do you foresee		Solving problems if
for 3D land administration?		ownership or rights
		overlaps or interlaces in the
		third dimension
7.8. Are the administrative source	Both, but presently there are	Both, but presently there
documents (source of RRRs) title or	usually deeds.	are usually deeds.
deed based?		
7.9 Who is responsible for the		Cadastral authorities.
correctness of the specified 3D		
boundaries in spatial source documents		
(which authority)?		
7.10. Is registration of 3D parcels done		Cadastral authorities.
inside the cadastral mapping agency,		
the land registry or elsewhere?		**
7.11. Are 3D registrations handled by		Yes
the same organisation that handles		
traditional (2D) land administration?	XZ TDI	XZ TDI
7.12. Do you supply paper-based titles	Yes. They contain depictions	Yes. They contain
or deeds or proof of ownership? If yes,	of 2D parcel or plans for	depictions of 2D parcel or
does this contain depictions of the 2D	apartment units.	plans for apartment units.
or 3D parcel?		Dathan samanata
7.13. Is the 3D registry separate or		Rather separate
integrated with the 2D registry?		
7.14. Any other RRR issues?		

8. DCDB (The Cadastral Database)

	Status 2018	Expectations 2022
8.0. Is database schema LADM based?	No, but it is prepared applying UML.	No, but it is prepared applying UML.
8.1. Does the DCDB contain representation of 3D parcels (in any form)?	No	No
8.2. If so, how are they represented (in the DCDB)?		
8.3. If so, how are they presented on cadastral "maps" (including screen presentations)?		
8.4. Are there possibilities to store geometry of 3D parcels in the DCDB?		Probably yes
8.5. Is it possible to manage a 3D topological structure in the DCDB?		Probably yes
8.6. Are constraints/rules defined for valid 3D objects (closed volume, no overlap, no gap in 3D)? What about rules for a mix of 2D and 3D representations?	No	Closed volume
8.7. How can internal and external user query and visualize the 3D content supporting rotating, slicing, transparency, perspective (3D web/view service, 3D pdf documents,)?		View services for internal Users, 3D pdf
8.8. What Spatial DBMS software do you use? Any 3D capabilities included and used?	Software varies depending of powiat (county). Some of software systems are original Polish productions, some are AutoCAD, Microstation, or ArcGIS based.	Software varies depending of powiat (county). Some of software systems are original Polish productions, some are AutoCAD, Microstation, or ArcGIS based.
8.9. Do you have any validation rules for 3D representation in the database?		
8.10. What (GIS/CAD) software is used for updating, editing, analysis, and visualization of the cadastral data? Any 3D capabilities included and used?	Any software that meets criteria for input data may be used.	Any software that meets criteria for input data may be used.
8.11. What web software is used for remote data access/distribution and visualization? Any 3D capabilities included and used?	Depends on county (powiat)	Depends on county (powiat)

9. Plans of Survey (including field sketches)

	Status 2018	Expectations 2022
9.1. Do the survey plans carry 3D	No	
parcel representations?		
9.2. If so, how are they represented?		
9.3. Is there specific legislation	Yes. Regulation of Minister	The changes in the
(regulations) describing the	of Internal Affairs of 9	legislation are expected
requirements for Plans of Survey in	November 2011 concerning	
3D? This could cover: a. accuracy/	technical standards for	
quality, b. 3D survey method, c.	topography and mapping,	
conceptual information model survey	results elaboration and	
plan, d. portrayal rules for graphic	forwarding to the state	
representation, e. format or encoding	geodetic and cartographic	
for submission. If so, please give link to	resource (Jo. Of Law no 263,	
the relevant documents.	item 1572)	
9.4. Is sketch level allowed (low		
geometric quality, but in principle		
enough to indicate the 3D object)?		
9.5. Is it possible to define a 3D parcel	No	No
by referring to other 3D real world		
objects/ topography (and not specifying		
coordinates)?		
9.6. In what format are the 3D parcels		The most probable is
submitted for registration; attached to		(City)GML
legal document in a single pdf (which		
has good 3D capabilities) or in an		
extension of (city)GML for 3D parcels,		
or?		
9.7. Are the 3D parcels somehow		
checked for spatial validity; e.g.		
volume is closed, does not overlap with		
neighbour volume (and also no		
unwanted 3D gaps)?	Vac	Vac
9.8. Do you have examples of	Yes	Yes
(prototype or production) 3D survey plans available?		
9.9. Are any reference objects visible	Yes	Yes
on the survey plan (e.g. real buildings,	ies	1 es
roads, that is 3D topography)?		
9.10. What form of 3D data acquisition	Any possible	Any possible
is used (CAD, terrestrial surveying,	Ally possible	Any possible
sketches, stereo/oblique images, laser		
scanning,)?		
9.11. What software do you use for	Any meeting input criteria.	Any meeting input criteria.
creating and processing survey plans?	my meeting input criteria.	They meeting input criteria.
Any 3D capabilities included and used?		
9.12. Can 3D parcels be subdivided,		Yes. Subdivided or
consolidated or nullified?		consolidated.
consolidated of humilied:		consolidated.

9.13. Is there any existing technical	Yes	Yes
circular or directive to assist Surveyors		
in 3D data collection in the field?		
9.14. Are the surveyors required to	No	Yes
undertake a field survey for 3D		
cadastral data?		
9.15. Are building construction plans	Yes	Yes
used to compile 3D cadastral		
information for apartments?		
9.16. Is 2D/3D field survey done by	Both possible, but usually	Both possible, but usually
private licensed surveyors or by	private.	private.
government surveyors?		
9.17. Are plans of survey created for	Updated in map or cadastral	Updated in map or
each new 2D/3D parcel or are they	database.	cadastral database.
updated in an index map or a cadastral		
database.		
9.18. Do you show dimensions or	No	
isometric views of 3D parcels on		
survey plans (do you also store this in a		
database)		
9.19. Do the cadastral survey plans	No	
differentiate between different types		
(e.g. volumetric plans, building plans		
and standard 2D plans)?		
9.20. What are the usual elements	North Arrow, Marks table,	
shown on the plan (e.g. North Arrow,	Administrative data, Plan	
Marks table, Observation table,	face	
Administrative data, Plan face and		
dimensions etc.?)		
9.21. Are authoritative cadastral	Both possible, but usually	Both possible, but usually
surveys carried out by government	private.	private.
surveyors or private licensed surveyors	1	1
or both?		
9.22. What is the legal description of a	coordinates	coordinates
cadastral boundary (e.g. coordinates or		
bearing and distance or lines on plan or		
any other)?		
9.23. How much time does it usually	Usually, at least 3 month.	
take for a subdivision process to		
complete?		
9.24. What is the legal source for	Regulation of the Minister of	
cadastral representation (e.g. cadastral	Regional Development and	
plans, or DCDB or index plans or	Construction of 29 March	
descriptive sketch/text etc.?)	2001 on the cadastre for land	
,	and buildings, Art. 22

10. Dissemination of 3D Cadastral information

10.1. Is there a general purpose web- based dissemination of 2D cadastral (graphical or text) information (e.g. a portal for the public or for professionals)? If yes, does it include 3D data? 10.2. Are specific file formats or standards used to distribute 3D Cadastral information? (e.g. LandXML, CityGML, BIM/IFC, 3D pdf,) 10.3. Are there specific cartographic styling rules for representing 3D cadastral objects on 2D cadastral maps? 10.4. Are there specific cartographic styling rules for 3D cadastral maps (models; e.g. as disseminated in 3D pdf)? If yes, are there 3D specific cartographic rules developed or being developed? 10.5. Is the 3D Cadastral information accessible in integrated manner with the 2D Cadastral map (paper, digital or web-based) indicating the presence of 3D Cadastral objects (and in web- context perhaps even linked)? 10.7. Is the legal information (RRSs and Parties) available in integrated manner in dissemination portal with the 3D Cadastral objects? (even if source of legal data may be a different organization, but then use information infrastructure approach) 10.8. Are 2D/3D cadastral data available to the general public or just to		Status 2018	Expectations 2022
based dissemination of 2D cadastral (graphical or text) information (e.g. a portals for the public or for professionals)? If yes, does it include 3D data? 10.2. Are specific file formats or standards used to distribute 3D Cadastral information? (e.g. LandXML, CityGML, BIM/IFC, 3D pdf,) 10.3. Are there specific cartographic styling rules for representing 3D cadastral objects on 2D cadastral maps (models; e.g. as disseminated in 3D pdf)? If yes, are there 3D specific cartographic rules developed? 10.5. Is the 3D Cadastral information accessible in integrated manner with the 2D Cadastral objects (and in webcontext perhaps even linked)? 10.7. Is the legal information portal with the 3D Cadastral objects? (even if source of legal data may be a different organization, but then use information infrastructure approach) 10.8. Are 2D/3D cadastral data available to the general public or just to information (including parcel	10.1 Is there a general purpose web-		-

11. Statistical information

This part of the questionnaire refers to statistical information (and is most relevant for jurisdictions with parts of 3D Cadastre registration operational, but all are encouraged to complete this section, and especially the expectations for 2022).

	Status 2018	Expectations 2022
11.1. What is the smallest 2D and 3D	No such restriction in 2D	•
parcel that is present/ allowed to be		
registered in the land administration?		
11.2. What is the largest 2D and 3D	No such restriction in 2D	
parcel that is present allowed to be		
registered in the land administration?		
11.3. What is the typical (or average)	Vary significantly,	
size of 2D and 3D parcels which are	depending of the region	
registered in the land administration?	(2D parcel).	
Subdivide by nature of 3D parcel when	` '	
relevant (e.g. related to building,		
apartment, airspace, tunnel,)		
11.4. How many 2D and 3D parcels do	Approx. 36 mln 2D parcels	
you currently have in your land		
administration?		
11.5. Which year did you start		
registering 3D parcels in the land		
administration?		
11.6. What is the ratio of 3D parcels in		
rural vs. urban areas?		
11.7. Please specify names of cities or		
towns or suburbs or regions or		
locations where there are significant		
numbers of 3D parcels.		
11.8. Please provide the following data:	Poland	
(a) Size of jurisdiction in square	a) 312 680	
kilometres	b) approx. 36 mln	
(b) Current number of 2D parcels	c) 0	
(c) Current number of 3D parcels	d) 38 413 thousands	
(d) Current population	(30.06.2018)	
11.9. Approximately what are the		
proportions of various types of the 3D		
parcels (related to apartments,		
subsurface parking, subsurface		
shopping centres, bridges, tunnels,		
airspace, utility networks, etc)?		
11.10. Approximately what surface area		
of the jurisdiction is affected by 3D		
parcels (the total area of all the		
footprint of all 3D parcels).		
11.11. Any other interesting statistical		
fact(s)?		

12. Reflection

This section is only relevant in case also in 2010 and/or in 2014 the 3D cadastres questionnaire for your jurisdictions was completed (otherwise skip this section).

	Remarks
12.1. Compared to the 2010 and 2014	
expectations, which 3D land	
administration developments did go	
faster than expected?	
12.2. Same question, but now, which	The 3D cadastre ideas got quite a big popularity, especially
developments did go slower than	(but not only) in academic community but they have not
expected?	not followed by legal regulations
12.3. If some (limited) form of 3D	Gives the general building parameters. Enables apartments
Land administration functionality has	units general localization within the building (apartment
become available, what are the	units complex).
observed benefits? And for who?	
12.4. What are the (top-3) challenges of	Formal definition of 3D cadastral objects in legal
issues to be addressed to realize further	regulations.
3D Land administration progress?	Pilot project.
	Creating at least circulars for 3D cadastral surveys.
12.5. In case of not yet fully operational	No
status, were there any 3D Cadastre	
registration pilots to take steps towards	
more full implementation?	
12.6. In case of known legal barriers,	No
have there been made progress in	
creating and adopting new legislation to	
support 3D land administration?	
12.7. Any other reflections?	

13. Other Issues

Please include any other issues that may be of interest in an international context. For example, in some foreign jurisdictions 3D parcels can only be separated by horizontal planes.

	Remarks
13.1. Country (State, Province)	Poland
13.2. Your name,	Dr. Jarosław Bydłosz, assistant professor (senior lecturer)
function/position and	Dr. Agnieszka Bieda, lecturer/researcher
your organization	AGH University of Science and Technology
13.3. Contact details:	AGH University of Science and Technology,
address	30-059 Kraków, al. Mickiewicza 30, paw. C-4
email,	<u>bydlosz@agh.edu.pl</u> , <u>bieda@agh.edu.pl</u>
telephone	+ 48 12 617 22 67
